Submersion-cooled racks installed at CGG in Houston, Texas

HOUSTON, TX, July 1, 2013 -- Data Center Knowledge has produced a video showcasing the submersion cooling portion of CGG's data center in Houston, Texas. The video from Data Center Knowledge represents the first publicly available look into the substantial submersion cooling installation located in Houston, Texas.

Two videos are featured in the Data Center Knowledge piece (clickable):

- [Taking the Plunge with Submerged Servers](#)
- [The Immersion Data Center: Submerged Servers at Scale](#)
